Hazelwood School

Hazelwood School is an education facility for up to sixty students with multiple disabilities. The students are aged between three and nineteen and the school provides education from nursery through to secondary stages. The school itself and the Life Skills House (an independent facility used for life learning and respite) have a combined area of 2,665 square metres and are set within a landscaped green adjacent to Bellahouston Park.

The design of the building has focused on creating a safe, stimulating environment for its pupils and staff. The focus and ambition from both client and architect at the outset was to develop a building that would eliminate as much as possible the institutional feel that a project of this nature inherently possesses. The designers worked to avoid conventional/standard details, creating a solution bespoke to the project requirements and developing a building that entirely embodied the users' needs.

The existing site was surrounded by mature lime trees and had a large lime tree and three beach trees in the centre. The building snakes through the site, curving around the existing trees. Its form creates a series of small garden spaces suitable to the small class sizes and maximises the potential for more intimate external teaching environments. Internally the curved form of the building reduces the visual scale of the main circulation spaces and helps remove the institutional feel that one long corridor would create – in addition, this also significantly reduces visual confusion by limiting the extents of the space.

黑泽伍德学校

黑泽伍德学校是为60余名残障学生所设计的教学基地。学校为这些3岁到19岁不等的学生提供从幼儿园到中学阶段的教育。学校和校园内的生活技能学习基地总面积2,665平方米，位于绿树成荫的贝拉霍斯顿公园。

建筑的设计旨在为学生和教职工创建一个安全又能激奋的环境。项目委托人和建筑师试图建造一个有别于其他教学设施、充分与自然环境相融合的学校。建筑在设计过程中有意地避开了传统校园的细节，营造了座符合项目要求、满足使用者愿望的建筑。

建筑场地四周环绕着高大的菩提树，场地中央也有一菩提树和三棵棕榈树。建筑蜿蜒于场地之中，没有破坏任何一棵树木。建筑的造型自然地勾勒出一系列与教规模相匹配的小花园，营造了更多的户外教学空间。室内，建筑蜿蜒的造型缩减了主流通区域的视野，减了又长又直的走廊所营造的教学气息。此外，弯曲的廊也限制了空间范围，减少了空旷空间所造成的视觉乱。
