

## 全国人大机关办公楼

Administrative Office of the National People's Congress(NPC)

建成时间 Completion Year : 2010  
建设面积 Building Area : 83 000m<sup>2</sup>

全国人大机关办公楼是全国人民代表大会常设机构的办公场所。方案采用简洁有力的城池形轮廓，使原有建筑和新建筑围合成一个完整的整体，在体量上与天安门广场和人民大会堂相协调，同时对南广场西侧松散的建筑群起到整理作用。

项目借鉴北京传统四合院的特点，从功能出发，采用庭院式布局，以现代办公楼的尺度为基准，衍生出一系列内向的、独立的庭院。每个庭院都可以作为独立的办公单元来使用，以适应多部门、多层次的办公划分要求。根据北京的气候条件，选择绿色技术策略，并进行优化整合。因此其是第一个获得绿色三星认证的政府办公建筑，成为全国政府办公建筑中绿色、节能的典范。

The Administrative Office is the permanent establishment of the National People's Congress (NPC). The design adopts a simple but powerful ancient-city plan to integrate the

new buildings with existing structures. The volume of the building is determined in comparison with Tian'anmen Square and the Great Hall of People, and also compensates the loose order of the buildings on the south square.

This project draws on the characteristics of traditional courtyards in Beijing, focusing on the distribution of the functions and adopting the courtyard layout. Based on the scale of modern office buildings, a series of inward and independent courtyards have been derived. Each courtyard can be isolated as an independent office to meet the demands of different departments and the division of multi-level offices. According to the climate conditions of Beijing, green technologies were applied and optimized. The new building has been awarded "Three-stars Green Certification", making it an energy-saving green building model for government office buildings.
