

## 望京科技园二期

Wangjing Science and  
Technology Park Phase II

建成时间 Completion Year : 2004  
建设面积 Building Area : 46 297m<sup>2</sup>

望京科技园二期是一个供高科技企业使用、配套齐全的办公建筑。该工程由三幢平面类似的建筑和一个连接体组成。两个主体量分别体现了矩形沿折线轨迹翻转的感觉，另一个体量是由密肋玻璃与全透明幕墙组成的从半透明到全透明的体量。主体块外墙采用低辐射印刷玻璃，经光线折射造成一种独特的图案效果。建筑布局采用占边的方法，以便形成秩序，同时在一期的北侧形成广场。景观绿化贯穿整个用地，并使二期与一期之间形成良好的关系。

Phase II of Wangjing Science and Technology Park is a complement office building with comprehensive facilities for high-tech enterprises. This project consists of three

buildings with similar layouts and a connection space. The two main volumes reflect the image of a rectangle turning along a folding line track, with the other volume made from semi-transparent to fully transparent materials, which is composed of ribbed glass and a fully transparent curtain wall. Low-radiation printing glass is adopted for the facade wall of the main building, and the refraction of light creates a unique pattern effect. The layout of the three buildings is set along the edges of the site to form a strong order and create a square on the north of the phase I project. Landscapes run through the whole land and generate a good relationship between phase II and phase I.
