

## 中国国际展览中心 I 期

China International Exhibition Center Phase I

建成时间 Completion Year : 2008

建设面积 Building Area : 180 000m<sup>2</sup>

合作公司 Partner : TVS INTERNATIONAL

中国国际展览中心 I 期展馆布局模式兼具功能性和实用性。展厅使用可分可合，既可满足多个小型展览同时布展，互不干扰，又能将展厅相互联通，承办大型展会。便捷的交通、良好的流线是现代展馆高效运营的必要保证，展览中心人流、车流、货流清晰独立，互不干扰。中轴景观设计从功能出发，紧扣地域文化。内部庭院采用中国传统的院落式布局，富有民族特色，进一步体现出整体设计中所尊崇的人文精神。

The layout of the Phase I pavilion of the China International Exhibition Center is both functional and practical. The use of the exhibition halls is flexible, which meets the needs of multiple small exhibitions without disturbing each other, and also connect the exhibition halls to large-scale exhibitions. Convenient transportation and a reasonable circulation are necessary guarantees for the efficient operation of modern exhibition halls. The flow of people, vehicles and materials of the exhibition center are independent and clear without interference from each other.

The central axis landscape design origins from basic functions and follows the local culture. The internal courtyard adopts the Chinese traditional courtyard layout, which expresses ethnic characteristics, and also embodies the humanistic spirit in the overall design.
