

## 联想园区 C 座

Block C of Lenovo Park

建成时间 Completion Year : 2004

建设面积 Building Area : 94 884m<sup>2</sup>

合作公司 Partner : SOM

联想园区 C 座采用双板连体建筑外形，建筑立面以轻盈通透的玻璃为主，配以灰色石材、金属遮阳板。全玻璃大堂采用悬索结构，晶莹剔透、雄伟恢弘。办公楼东侧三层以上采用了斜拉索，向东悬挑 9m，形成三面采光、开敞通透的办公环境。大楼西侧及十七层采用双层呼吸幕墙，南侧采用水平丝网印刷玻璃遮阳板，用来遮挡直射光及避免眩光。底层双层挑高的外廊与上部落下的片墙、过廊形成丰富的流动空间，行走其中可感受到中国传统园林的意境。

The Lenovo Park C Block adopts the shape of the double-panel building. The facade of the building is mainly made of light and transparent glass, with grey stone and metal sun visors. The glass lobby features

with a suspension structure which is crystal clear, forming a majestic space feeling. The stay cables are used for the floors above the 3rd floor on the east side of the office building and cantilevered 9 meters to the east to form an office environment with three sides of light, open and bright. The double-layer respirable curtain wall is used on the west side and the 17th floor of the building, and the horizontal screen printing glass sun visor is used on the south side to block direct sunlight and avoid glare. The two-story overhead space with the walls going down and the corridor together form a flowing space, where people can feel the artistic conception of Chinese traditional gardens while walking.
