## Advice-House

Advice-House is the first completed building in the Lysholt Park, a new business-park north of Vejle, and is, with its proximity to the motorway, designated to act as landmark and eye-catcher for the entire development. The Advice-House interior is 5,000 square metres of open and flexible office layout, where various tenants share the same large space, which offers dramatic perspectives and angles. The building is shaped around two angled office wings, separated by an equally angled atrium, resulting in a plan resembling a hexagon with one angle pushed inwards. The two wings are connected by walkways across the atrium, and the floors' continuous window-bands give a high degree of freedom in the space-planning. A large, north-facing glazed gable gives passers by a glimpse into the dynamic void, day or night, and the open and transparent interior is also naturally ventilated.

The building's unusual geometry makes for a dramatic and changing appearance when cars are passing by on the motorway, and this mutability in form and shadows is further heightened by the colouring and texturing of the façades, designed to catch the light. The cladding-strips are composed of a "random" sequence of a total of thirteen differently-proportioned cladding panels, some of which are folded diagonally to create a triangulated pattern. The panels are mounted horizontally at staggered intervals, creating a glittering array of colours, light and shadows.

## 建议大厦

建议大厦是维积利北部的新商业园区——利肖尔特商业园第一座建成的建筑。由于其位置靠近高速公路，建议大厦也是整个园区建设工程的地标。建议大厦内部拥有5,000平方米的灵活开放办公空间，为各式各样的租户呈现了多样化的景观和角度。建筑由两个呈角度办公翼楼组成，二者中间隔着一个中庭，整体呈现出一个凹六边形结构。建筑的两翼由中庭之间的走道相连接，不间断的玻璃窗带为空间规划提供了高度的自由。朝北的三角形结构在白天和黑夜都能给人以动态的空间感。开放而通透的室内具有自然通风系统。

当车辆从高速公路上驶过时，建筑会呈现出变幻多端的造型，而能够捕捉光线的外墙则进一步为建筑增添了光影效果。建筑外墙上装饰条共由13中不同比例的墙板组成，其排列次序完全是随机的，其中一些墙板还被弯折成为了三角形。这些墙板交错排列，光影交错、熠熠生辉。
