

XI'AN GREENLAND CENTER

西安绿地中心

用地面积	建筑面积	设计时间	建筑类型
17 000平方米	165 000平方米	2011年1月至今	超高层

十三朝古都西安正经历一次新的发展大浪潮，以绿博会为契机大力发展开发区经济。西安绿地中心正是这大浪淘沙中一颗闪亮的钻石。东西两座双子塔顶高270米，是开发区乃至整个西安市的天际制高点。从远处看犹如一座巨门，面向开发区CBD的建筑群。整体造型以钻石为原型，强调精准切割的体形美和玻璃材质所体现的璀璨质感。摒弃多余的装饰，只采用简洁的形体切割手法，意在充分强调接近300米高度的体形，和形体本身所表现出的完美的比例。

Xi'an City is an ancient capital of 13 dynasties and is witnessing a new development surge. It grasps the opportunity of Green Expo to realize fast economic development in the development zone. Xi'an Greenland Center is just a shining diamond in this development surge. The two twin towers located at east and west are 270m high and they form the highest skyline in the development zone, even in Xi'an. Viewed from a far distance, they are like a huge gate opening up to the building cluster in CBD of the development zone. These twin towers are designed based on the shape of diamond, emphasizing on the precisely-cut aesthetic appearance and glistening glass material. The method of replacing redundant decoration with simple shape highlights the unique building shape about 300m high and perfect dimensional proportion of building body.
